

NECK SKINNER (INLINE)

Model # DMNS 101

The *DMNS 101 In-line Neck Skinner* is designed to skin the neck while the neck is still attached to the carcass. It is designed to run at speeds up to 150 B.P.M.

We use specially designed rollers to increase yield without damaging the breast. Works with existing lines, designed to handle a wide range of bird sizes, ease of adjustability, and Low Maintenance cost.
